

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times. Volume 35 (Paperback)

Filesize: 3.7 MB

Reviews

Totally one of the best pdf We have possibly study. Yes, it really is perform, continue to an interesting and amazing literature. I am happy to let you know that this is the very best ebook i actually have go through in my personal life and can be he best pdf for possibly.

(Korbin Hammes)

**MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION
OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES.
VOLUME 35 (PAPERBACK)**

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .m degres et -degres? Of this Question thi re is a solution in the Annales for August, 1861, where the probability is found to be $\cos m - \cos n$; but it is remarked that Laplace trouve ($\cos m - \cos n : 90$), ce qui semble inexact. 4753. (By Prof. Cropton, F.R.S.)--If 1, 2, 3, 4 are four concyclic points on a Cassinian oval whose foci are F, F', show that a bicircular oval can be drawn with 1, 2, 3, 4 as foci to pass through F, F'. Show also that the tangents at F, F' are double tangents; each touching the bicircular oval in a second point, and each passing through the centre of the circle 1234. Solution by Prof. Nash, M.A.; Prof. Scheffer, M.A.; and others. The equation of a Cassinian is $(x^2 + y^2 + c^2)^2 - 4c^2xy = m^4$ (1), the foci of which are $x = c, y = 0$. Let the equation of the circle through 1, 2, 3, 4 be $x^2 + y^2 = 2ax + 2by + c^2$ (2), a, b being the coordinates of the centre O. Substituting for $x^2 + y^2$ in (1), the equation of a conic through 1, 2, 3, 4 is $(2ax + 2by + c^2 + cy - icW - m^4)$ (3). The asymptotes of this conic are parallel to the lines $(ax + By)^2 - A^2 = 0$, and therefore perpendicular to the lines OF, OF', i.e., $(x - ay) - (y - W - i)$. Hence OF, OF' are double tangents to a bicircular quartic, having (2) for a circle...
