

Chemical Studies of the Terpenes (Paperback)

Filesize: 8.64 MB

Reviews

Comprehensive information for publication enthusiasts. It is rally exciting through reading through time. I am happy to tell you that here is the greatest book i have got read through in my personal existence and can be he best ebook for possibly.

(Reese Morisette)

CHEMICAL STUDIES OF THE TERPENES (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .in 1879, stated that copper is blackened under turpentine oil, while Engler and Kneis99, in 1891, asserted that it is also partly dissolved. The terpene peroxides have been found to dissolve copper, as evidenced by a green solution, without any blackening of the surface of the copper, and without any apparent loss in activity. Silver. Baeyer136 has shown that the alkyl peroxides oxidize silver. and Vanino-1 v has reported the same results for other organic peroxides. Schoenbein9, in 1851, showed that the oils of turpentine, lemon, juniper, and lavender, with the aid of acetic acid, dissolve silver, as demonstrated by precipitation with sodium chloride The terpene peroxides give a blackening of silver within a few minutes and a gradual precipitate of a reddish-brown material. The activity is thereby considerably decreased. Magnesium. That turpentine oil dissolves magnesium was reported by Engler and Kneis, in 1891. The terpene peroxides have no apparent effect, and the oxidizing power is but little decreased. Zinc. Engler and Kneis9(r), in 1891, found that zinc is dissolved by turpentine oil, while Kingzett and Woodcock-l-6, n 1910, found crystals of zinc format as a product. Treated with zinc, the terpene peroxides give no effect to be noticed, but there is considerable loss in activity. Mercury. As is-well known, Schoenbein-(r), in 1845, demonstrated the difference between oxygen and ozone by their behavior toward mercury. That the latter destroys organic peroxides has been stated by Ramsay03. Berthelot57, in 1859, and Engler and Weissberg12, in 1898, showed...
