

## Mechanics of Materials (Higher construction materials engineering series)

Filesize: 2.06 MB

### ***Reviews***

*It becomes an amazing pdf that I actually have ever go through. This is for those who statte that there had not been a worth reading through. You will like how the author create this pdf.*

***(Prof. Lonie Roob)***

## MECHANICS OF MATERIALS (HIGHER CONSTRUCTION MATERIALS ENGINEERING SERIES)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 367 Publisher: China Construction Industry Pub. Date :2011-06-01 version 1. Mechanics of materials in accordance with national ranking of the Higher Technical School Board of Education Teaching the basic requirements of mechanics of materials (civil engineering and more hours) and write percent. Edited by Zhang as third-class Mechanics of Materials include: Introduction. axial stretching and compression. torsion. bending force. the geometric properties of plane figures. bending stress. bending. energy methods. analysis of stress state and strain state. strength theory . combined deformation. strut stability. dynamic load. cyclic stress and plastic materials when considering the carrying capacity of bars and other 15 chapters. Who compiled the book Example 146. Problem 318. In the Appendix. in addition to exercises and answer sheet steel specifications. but also incorporated into the structural design methods and materials Introduction to the basic requirements for teaching mechanics. Mechanics of Materials can be used as Higher Technical School of the common materials of professional civil engineering. but also for adults. college and university selection. Contents: Chapter 1 Introduction Section II the task of mechanics of materials mechanics of materials research methods and other courses of the third quarter with the deformation of the concept and the ideal model of solid bars of the fourth basic component of deformation in the form V small deformation and linear elastic force Section VI and VII of the stress and strain section method Chapter axial tension and compression Section II the concept of tension and compression forces pull the struts - axial force and axial trying to pull the strut cross-section of the third quarter and fourth quarter of stress on the inclined section stress distribution and stress concentration...
