Reviews

A top quality ebook as well as the typeface used was interesting to see. It usually fails to charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

MATERNAL-NEWBORN THYROID DYSFUNCTION

LAP Lambert Academic Publishing Mai 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x22 mm. This item is printed on demand - Print on Demand Neuware - I obtained my master degree of Science in Zoology with general specialisation in Cell Biology and Histology and particularly in developmental-biology and -physiology field in 2005. I mainly worked on developing rat brain and spinal cord during pre- and post-natal periods. I subsequently obtained my PhD degree in zoology with general specialisation in Embryology and Comparative Anatomy and particularly in developmental-neuroendocrinology and -physiology field in 2009. I studied the interactions between the different states of thyroid hormones and rat brain development during the perinatal period. I gained a remarkable experience in different biochemical and histological techniques and especially in the analysis of vertebrate brain morphology. During both degrees and a short postdoctoral period, I published generally seventeen papers in different international journals and chapters. Therefore now I also have a strong background in endocrinology. However, my experimental work will not improve accordingly due to the lack of grants to reach the highest objectives. Thus, I am searching for a postdoctoral place to develop my individual skills and enhance my career prospects. 368 pp. Englisch.
